Let's confirm your email

Type in the code we sent to tata@me.com.

🛡️ Your privacy is important

We may send you member updates, recruiter messages, job suggestions, invitations, reminders and promotional messages from us and our partners. You can change your [preferences](#) anytime.

Agree & Confirm

Didn't receive the code? [Send again](#)

REQUIREMENTS

- Informations fill up to these form should be reported to the user personal informations directly so the user don't need to go there to complete his/her details. This is really important because from this part NAETY should be able to display suggested information base on the location or the company to the user profile (home).
- There will be 3 steps because we need to get information as much as we can from the user (you can see **Profile - Community - Interests**)
- **Profile** (will helps us to know much from the beginning the user)
- **Community** (Build the user network from there, starting by asking to invite friends base of contacts or email address) Asking the user to have access on his email contact so he could invite friends or add friends already on the platform - Also from this steps suggestions based on the location can be display to the user
- **Interests** (From there if the user is a student, Naety should suggest the university already present in the platform, influencers and top best companies based on the country present in Naety) Thus the user can decide to follow these companies or influencers.

This is very important requirements I am sending you and should be there from stage 1.

Use company colour for the form, instead blue it should be red burgundy

THANK YOU
